I have been crocheting hyperbolic planes for many years exploring various materials. I used plastic shopping bags from various stores to draw attention to how indestructible they are and that we should be aware how much they pollute our environment. Audioplane is crocheted from audio tapes which are now becoming obsolete. This piece is a part of a larger project "Memories we keep".

Audioplane, 10 x 10 x 7 inches, medium: audio tape, 2020
