Tetrahedron

Tetraedro

Is it possible to distribute numbers 1 to 10, four on the vertices of this tetrahedron, and the other six on its edges, in such a way that the sum of the three numbers in each of the six edges is equal to 13?

¿Es posible distribuir los números de 1 a 10, cuatro en los vértices de un tetraedro y los otros seis en las aristas, de tal manera que la suma de los tres números en cada una de las seis aristas sea igual a trece?

Julia Robinson Mathematics Festival[®]

at MAA Mathfest

Hosted by

SIGMAA on Math Circles

Join fellow math
and puzzle enthusiasts to
visit over 20 tables with various
games, problems, and activities
centered on creative,
collaborative inquiry.

August 3rd, 2019
10AM-12PM

Junior Ballroom, 3rd Floor
Duke Energy Convention Center
525 Elm St, Cincinnati, OH 45202

Visit JRMF.org for more information & to register (FREE!)
